ARCHITECTURAL

SPECIALISTS IN ARCHITECTURAL CAST STONE MASONRY

CE MARKING OF CAST STONE

As you are no doubt aware from 1st July 2013 New European Union regulations have meant that many more construction products used on UK sites will need to conform to the requirements of the Construction Products Regulation (CPR). This now includes Cast Stone.

In simple terms, if a product is covered by a harmonised EN standard or ETA and is listed in one of the many categories included within the Construction Products Regulations, it WILL BE ILLEGAL TO SELL THE PRODUCT WITHIN ALL E.U. MEMBER STATES WITHOUT IT CARRYING A GENUINE CE MARK. This mandatory regulation applies to both manufacturers AND distributors, as both have responsibilities in this regard.

Vobster Architectural invested significant time and resource to ensure that both it and its Cast Stone products, where necessary, were ready in time for the Construction Products Regulation.

We are therefore very pleased to confirm that all relevant Vobster Architectural products are labelled accordingly on the packaging and / or the product with the CE Mark. In tandem with this, a Declaration of Performance (DoP) for each specific item is available upon request by contacting sales@vobsterarchitectural.co.uk.
