

CE Marking of Cast Stone Products

All relevant cast stone products manufactured by Vobster Architectural will bear a CE mark in compliance with The Construction Products (Amendment) Regulations 2022.

In simple terms, if a product is covered by a harmonised EN standard or ETA and is listed in one of the many categories included within the Construction Products Regulations, it will be illegal to sell the product to an EU member state without it carrying a genuine CE mark. This mandatory regulation applies to both manufacturers and distributors, as both have the same responsibilities.

Products are labelled accordingly on the packaging and/or the product with the CE Mark. In tandem with this, a Declaration of Performance (DoP) for each specific item is available upon request by contacting sales@vobsterarchitectural.co.uk.
